

6TH TÜRKİYE EUROPE FORUM

VISION DOCUMENT (DRAFT)

6TH TÜRKİYE - EUROPE FORUM

“Future of the European Economy and Türkiye”

(2023, Istanbul)

In addition to the developments experienced on the global scale and the transformation that the European Union undergoes within itself, the sharp turns recently taken in the domestic politics of Türkiye have caused the emergence of some problems in its relations with the European countries.

However, the factors, such as the fact that Türkiye is a natural extension of the Continent, its modernization and westernization experiences in history, the importance of the European markets for the Turkish economy, require the revision and improvement of the relations with all the European countries.

On the other hand, the needs, such as controlling the migration movements directed from different crisis areas of the world, in particular the Middle East, to Europe, and stabilizing the European countries' energy security, and strengthening the European-Asian connections, also strengthen such a characteristic of Türkiye that it is an unignorable partner for the European countries.

Controlling the migration phenomenon, limiting terrorism, developing the security measures, developing the opportunities for an academic and technological cooperation, and sharing the experiences in the fields of energy and technology depend on the development of the relations with the European countries. **The 6th Türkiye - Europe Forum**, which will be held with the main theme of **the “Future of the European Economy and Türkiye”** aims at contributing to this field.
