## CALL FOR PAPER

# “NEW WORLD REGULATION AFTER COVID-19” SPECIAL WORKSHOP “System Models”

A concept study titled “**New World Regulation**”, which will be made as the new phase of the strategic research project titled New World Economy and Security Architecture, firstly requires answering the question: How is it possible to achieve consistent results from other ongoing discussions in the field of international relations without a comprehensive system discussion?

The Covid-19 outbreak is a critical milestone for the change in production, consumption, growth, and conventional power standards, including security and defense. Scenarios and preparations have become the top priority for the reinterpretation of the international immune system / infrastructure and for strategic transformation. In this context, developing “System Models for New World Regulation” has become an imperative, not a choice.

The other main questions that need to be based on the New World regulation are as follows:

Is the system crisis, increasingly felt by the globalization, "global-thaw" and regionalization debates, a structural crisis or a method crisis caused by tactical and strategic mistakes? Do international organizations such as the WTO, IMF and DB, especially the United Nations, have a capacity conducive to reform; what are the possibilities and conditions of “structural reform”?

Does the Islamic world have a applicable civilisation project?

What is Turkey's perception of the “New World” and how should it be understood? Can Turkey, besides its historical background and cultural diversity, evaluate the advantages arising from its geopolitical position with optimum efficiency and develop an alternative “system model” to the “crossroads role” between the capitalist poles?

How is it possible for Turkey or any other Islamic country to maintain its place in the New World unless the “Islamic world”, the other name of Turkey's historical and cultural geography, acts with a common vision; in this context, what is the perception of the world as a “**New Turkey**” and how should it be understood?

Is **digital-globalization** a model of a new global system that is much easier to manage, or a systemlessness that is almost impossible to control?
